About me

I take ownership of the applications/ modules I work on. I consider myself a tech enthusiast and like to attend meetup related to same. While my work focuses on creating web applications, I have explored area of machine learning and fintech. I could tell you about it, but THAT would NOT be a "length-limited" conversation!

Experience

Software developer

Morgan Stanley (Consultant)

since April 2017

Conversion of existing applications with angular for client side and revamping server side to expose restful api with java.

Frontend Developer

Tapzo

Decemeber 2015 - April 2017

Building features for a high end B2B product with react and angular in client side and nodejs in server side.

Freelancer/ Entrepreneur

Hearsid

May 2013 - December 2015

Created many websites which helped companies to show their online presence and advertise their business. Created and managed an online webiste website for a client in Europe. Created a webapp and mobile app for car brokers to track their clients interest and respond to them on time.

Education

Rajasthan Technical University

B.Tech.

June 2009 - July 2013

B.Tech. in Electronics and Communication.

<> Projects

Transaction Manager

Angular, Java

Revamped Transaction Manager application which was a part of the prime brokerage department from flex to angular with ngrx. It has a few screens including new entry, inquiry and exceptions screen. New entry screen allowed traders to book a new trade entering all the information about the trade like asset type, custodian broker, executing broker, security etc. whereas inquiry and exceptions screen gave the information about the status of the trade booked in the screen. The trade information was given in a grids and records length went upto a limit of upto 50 thousand or more records.

Colaterized Loan Obligation

Angular, Java

Allowed to view the CLO performance by showing the information in a grid and in form of a chart, business logic was included to determine what data to show.

Predictive analysis

Python

Worked on a machine learning project to predict potential defaulters in the internal auditing.

Onedirect

React, Angular, nodejs, Java

Worked on a B2B product used by many companies to respond to the consumer complaints on social media, the application acted as a social media aggregator taking the posts from facebook, twitter, playstore and showing them on a common dashboard so the customer care can address the complaints easily. Cients included indian railways, britania and more.

Caretaker app

React, Java, Spring, Hibernate

Creating API which were integrated with the web app and android/iPhone apps using Java and dashboard using react.

Web/ Mobile apps

React, Angular, nodejs, Java

I rented a desk at a co-working place called PIIC in Pune and started my journey as a freelance software developer and explored the business oportunites in the same. Worked on angular, python, java and nodejs.

Contributions

Relax

<http://getrelax.com/>

Contributed towards making a good and reliable CMS based on reactjs, graphql and nodejs.

Github

<http://github.com/hearsid>

Contributions to some open source projects.

Medium

<http://medium.com/@hearsid>

Angular1 vs angular2 performance analysis with statistics.
