Siddharth SHARMA

Software Developer
Bangalore

I take ownership of the applications/ modules I work on. I consider myself a tech enthusiast and like to attend meetup related to same. While my work focuses on creating web applications, I have explored area of machine learning and fintech. I could tell you about it, but THAT would NOT be a "length-limited" conversation!

Freelancer/ Entrepreneur
Hearsid
May 2013 - December 2015
Created many websites which helped companies to show their online presence and advertise their business. Created and managed an online webiste website for a client in Europe. Created a webapp and mobile app for car brokers to track their clients interest and respond to them on time.

Education

Rajasthan Technical University
B.Tech.
June 2009 - July 2013
B.Tech. in Electronics and Communication.

Projects

Transaction Manager
Angular, Java
Revamped Transaction Manager application which was a part of the prime brokerage department from from flex to angular with ngrx. It has a few screens including new entry, inquiry and exceptions screen. New entry screen allowed traders to book a new trade entering all the information about the trade like asset type, custodian broker, executing broker, security etc. whereas inquiry and exceptions screen gave the information about the status of the trade booked in the screen. The trade information was given in a grids and records length went upto a limit of upto 50 thousand or more records.

Colaterized Loan Obligation
Angular, Java
Allowed to view the CLO performance by showing the information in a grid and in form of a chart, business logic was included to determine what data to show.

Preditive analysis
Python
Worked on a machine learning project to predict potential defaulters in the internal auditing.

Onedirect
React, Angular, nodejs, Java
Worked on a B2B product used by many companies to respond to the consumer complaints on social media, the application acted as a social media aggregator taking the posts from facebook, twitter, playstore and showing them on a common dashboard so the customer care can address the compaints easily. Cients included indian railways, britania and more.

Caretaker app
React, Java, Spring, Hibernate
Creating API which were integrated with the web app and android/iPhone apps using Java and dashboard using react.

Web/ Mobile apps
React, Angular, nodejs, Java
I rented a desk at a co-working place called PIIC in Pune and started my journey as a freelance software developer and explored the business oportunites in the same. Worked on angular, python, java and nodejs.

Top Skills

HTML5 CSS3 JavaScript Node.js Angular

TypeScript React

Contributions

Relax
Contributed towards making a good and reliable CMS based on reactjs, graphql and nodejs.
